GCSE MATHS AND POST-16 RESITS

More grade 4s. Less workload.

Raise GCSE maths results at your college with one platform. Keep your students engaged, see progress on every learning objective across your team, and act where it matters.

Every mock, test, quiz and piece of homework becomes question-level feedback the same day. You see exactly where the gaps are, with the next step one click away. Built by a working maths teacher.

The right view for each person

Everyone sees what is happening, with the next step built in.

Your students

Every topic with its grade, mock score, best quiz and what their teacher has seen. A lesson, then a quiz, on any topic, with homework and comments waiting on their home page.

Your teachers

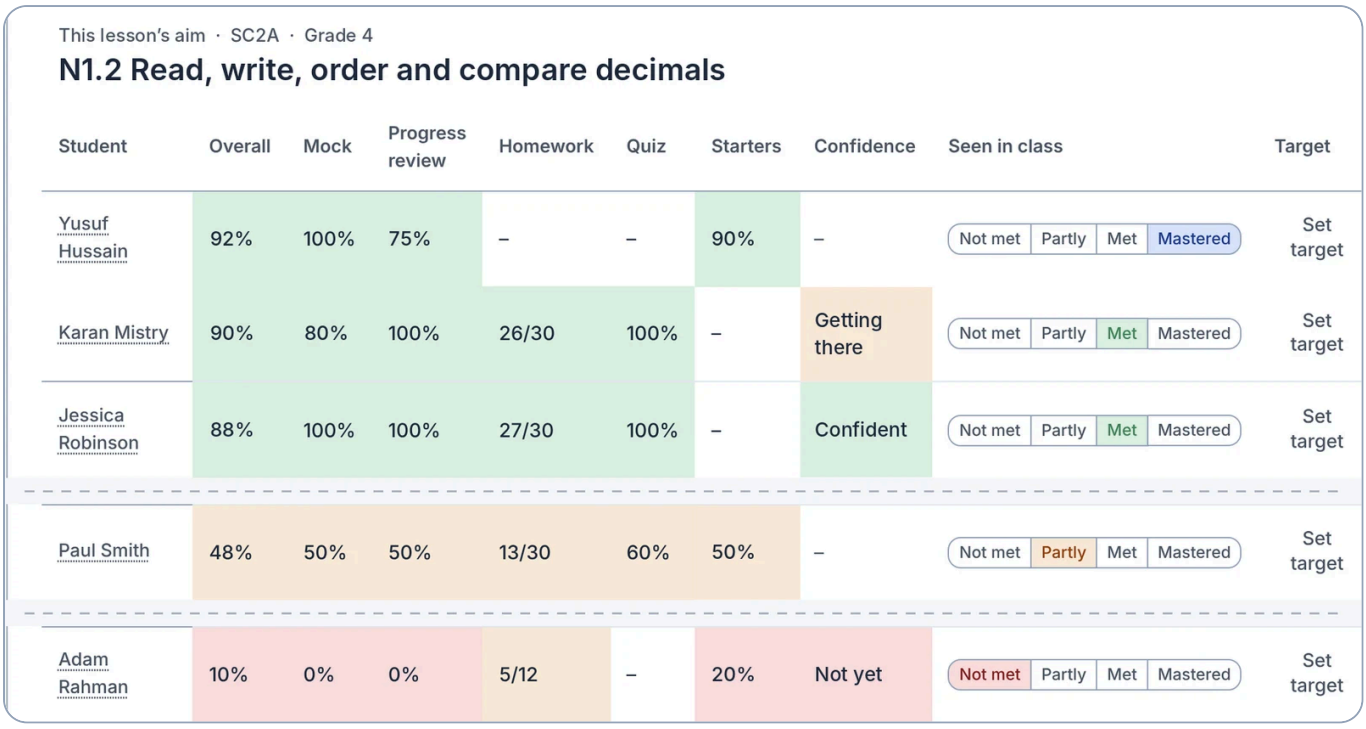
See today's class on today's topic: mock, progress test, starters, homework and quiz side by side. Set homework to the whole class, a few students or everyone under 50%.

Department head

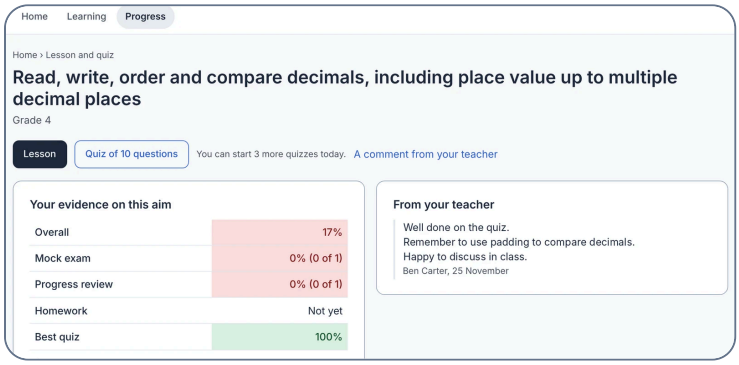
See every student by topic, filtered by class, prior grade or teacher. Focused analytics, for example November resit, geometry, for Health & Social Care. Spot the learning objectives easiest to secure across the year group, and set department homework centrally.

See the matrix

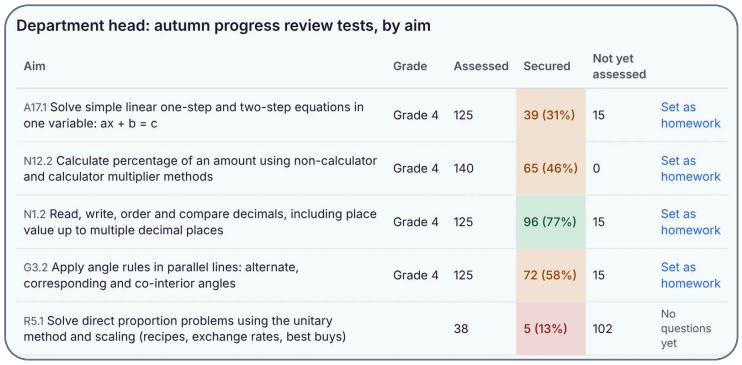
THE RIGHT VIEW FOR EACH PERSON



Teacher: this lesson's aim, every source of evidence side by side.



Student: my evidence on one aim.



Department head: who has secured each aim.

See every gap. Act the same day.

1

Feedback the same day

Students enter their own marks by phone, or teachers tap them in. You get question-level analysis and grades at once, not weeks later.

2

Close the gaps

Every red topic links to a lesson, a quiz or homework. Your teachers set it to just the students who need it, in one click.

3

Evidence of impact

You see which students, which topics, what your teachers did and whether it worked, mock after mock, across every class.

Mock data captured on the day teachers give feedback

Students scan a QR code, sign in with Microsoft or a one-time PIN, and tap a mark per question. Your teachers watch the class fill in live, then check and approve every mark before it counts. Each student then gets a report with a lesson and quiz on every question.

Scan to try it on your phone

Your teachers stay in control. MockMock asks them to check and approve every mark before it counts.

Less workload: what comes off your teachers' desks

Mock spreadsheets

Students enter their marks and the analysis is automatic. Or your teachers easily enter scores in our app while they mark.

Marking

Quizzes, starters and homework mark themselves, with scores recorded instantly.

Setting homework

One click, to just the students who need it, or tee up the whole year linked to your scheme in a few clicks.

Recording what you see in class

Mark a learning objective as seen on the spot: not met, partly met, met or mastered.

Cover and papers

A print-ready lesson pack in one click, a paper built from the bank, and ready-to-go worksheets. Or build your own.

Built in. No extra subscriptions.

Independent study

Lessons, quizzes, and past and practice papers with worked solutions, for every GCSE topic. Students rate their confidence and watch red topics turn green.

Cover lessons in one click

Print one PDF for any topic: slides, a worked guide, two worksheets and the answers.

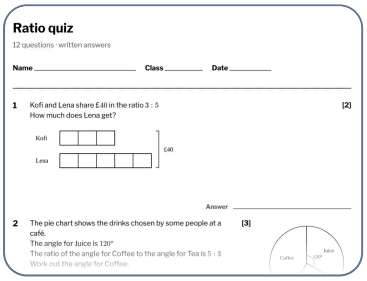
A department forum

Post a teaching idea and the scores that show it landed. Colleagues reply and vote up the best, so good practice spreads across every site.

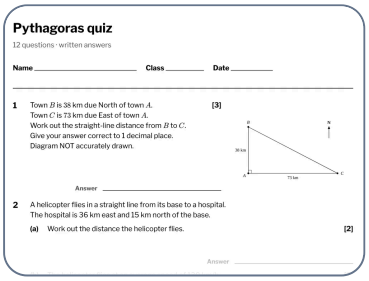
Ready-made resources, with the answers

Worksheets with answers, practice papers with worked solutions, and multiple-choice quizzes with a step-by-step suggested solution after every question. A sample:

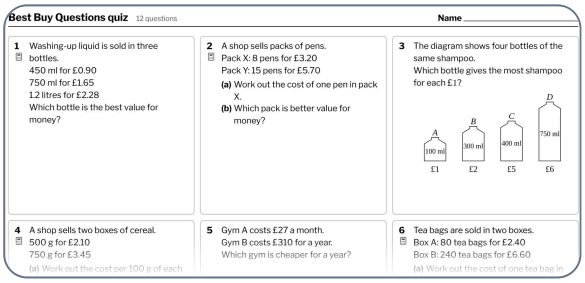
Worksheets



Ratio

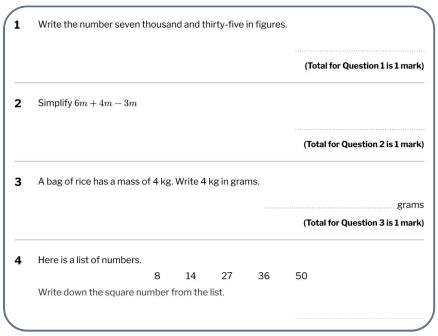


Pythagoras

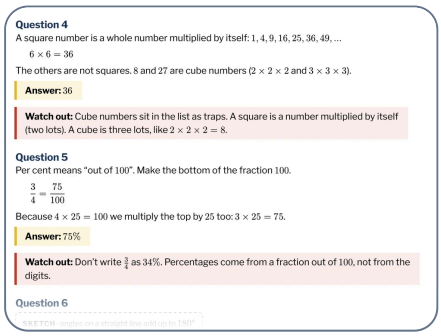


Best buys, six questions to a page

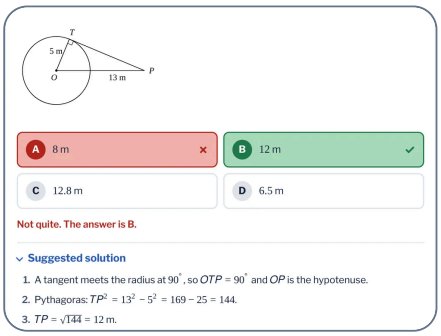
Practice papers, worked solutions and quizzes



A practice paper, Foundation Paper 1.



Its worked solutions, with what to watch out for.



A multiple-choice quiz with a suggested solution.

Questions to ask us

What difference will it make?

You get feedback and data as soon as your teachers have marked the mock, not weeks later. Every topic is tracked day in, day out, and mock by mock, so you see which gaps closed and for whom.

How is student data protected?

GDPR compliant, DPIA available. Your department's data sits in its own separate database. Your staff see only what their role allows, and every access to a student record is logged.

Does it use AI?

Not in the app. Many students are pushing back on learning through AI chatbots, and MockMock keeps learning between students and their teachers. AI does not process your data or control any interaction, and never trains on it. We wrote our question bank with AI assistance. Teachers validated it, and working teachers road test it.

How long does setup take?

We take care of onboarding for you: we import your class lists and set up your staff. Or follow a few simple steps in the app yourself. Nothing to install. Students sign in on a computer or their own device from one class QR code.

What will it cost?

One price for your department, with everything included. No extra subscriptions, no add-ons. As an early adopter you get every new feature as it is developed, with no extra charge and a price lock. Ask us for pricing.

Can we try it first?

Yes. Ask us about a pilot term for your department. Students like the quizzes and starters, so you start collecting data straight away.

Book a call or meeting

Questions, a walkthrough for your department, a pilot term or pricing. Help every student pass GCSE maths, and help the ones who can to excel.
